

Your All-In-One Processing Solution

ValuePak 8320 integrated electronic point-of-sale (POS) payment terminal and automatic check reader is the newest addition to the famed ValuePak line. All of our ValuePaks have been designed to support a complete range of retail payment transactions including magnetic credit, debit, gift and loyalty cards, smart cards, checks, private label and more, now with PED compliance.

Much effort has been invested in the design and engineering of all ValuePak models for the operational ease and benefit of both retailer and customer. The ValuePak 8320 model is now available to the retail and ISO community. The ValuePak 8320 is a landline model requiring a telephone line and AC power source for normal operation. This unit incorporates, all of the original ValuePak's capabilities with a faster 14,400 modem and the speed and quiet printing of the integrated thermal printer, this PED compliant unit is the top of the line POS addition to the trusted ValuePak line.

A Real Value Processor

The integrated check reader in all ValuePak models, automatically and accurately reads personal or commercial checks. Internal paper sensors detect the presence of a check and subsequently activate a motorized "pull-in" transport mechanism. Magnetic data is automatically transferred to the unit's POS terminal where it is processed as an electronic transaction. The ValuePak line has been designed to suit the needs of the retail and mobile business community. This point of sale system provides merchants with the ability to accept credit cards, debit cards, and checks in one easy-to-use module. Acknowledged as an "All in One Payment Solution," the ValuePak line is one of the industries premier point of sale systems.

Mid Atlantic Processing provides the "Partial Download" needed for the "Check Service" process, as well as all technical support for our ValuePak equipment. The Partial Download is designed to integrate with all Credit Card Processing Downloads. Full download and deployment is also available.

ValuePak Features

- Low-cost, all-in-one terminal solution
